TABLE OF CONTENTS

PREFACE	v
INTRODUCTION	1
1 GENERAL PREPARATIONS FOR FIRE INVESTIGATIONS	3
Know Your Investigation Objectives	4
Know Your Limitations	5
Recognize Others' Interests	7
Know Your Investigation Procedures	8
Prepare The Equipment You Will Need	9
Know Work Product Quality-Assurance Procedures	9
Know Sources For Help	9
Prepare Responders to Help	10
Know What To Do If Incendiary Origin Is Suspected	10
Know Contents Of This Guide	10
2 SPECIAL FIRE INVESTIGATION KNOWLEDGE	11
Fire Process Knowledge	11
Fire Process Model Elements	12
Fuel — Element 1	13
Heat — Element 2	15
Oxygen — Element 3	16
Char Forms — Element 4	16
Vaporized Fuels Disperse	18
Fuel Vapors Ignite (1.3.2)	19
Oxidizing Vapors Form Reaction Products	19
Heat Produces More Fuel Vapors — Element 5	21
Flame Spread — Element 6	21
Flames Subsided (6.1)	23
Heat Harms People, Objects — Element 7	24
Emergency Response Actions — Element 8	24
Overhaul (8.1)	25
Fire Investigation Process Knowledge	25
What is Being Investigated?	25
Why Investigators Investigate	26
How Fire Investigators Investigate	27
Investigation Data Sources	38
Getting Events From Objects	39
Getting Data for Events From People	42
Special Fire Investigation Considerations	45
Handling Unknowns	45
Watch for Biases	45
Communications	45
Requests for Information	46
Filling in Forms	46
Summary	46

3 FIRE INVESTIGATION TASKS	47
Start Your Data Organization	48
Confirm Control Of The Site	48
Position Access and Egress Controls	49
Set Data-Acquisition Task Priorities At Site	50
Do Site Walkaround and Walkthrough	51
Get The Rest Of Data You Need	54
"Read Objects"	56
Additional Observations	57
Get Data From People	58
Scheduling Interviews	58
Interview Procedures	58
Prepare Investigation Work Products	61
Satisfy Visualization Rule	61
Report Recommendations	62
4 FIRE INVESTIGATORS' TASKS	63
Investigation Preparations	63
Upon Notification of a Specific Fire, Verify Your Plans	63
On Arrival At Site	64
Confirm Control of Site	64
Set Data-Gathering Task Priorities	64
Do an External Walkaround at Site	64
Do an Internal Walkthrough at Site	65
Look for Signs of Origin on Inside of Structure	65
Document Remaining Data and Events at Site	65
Locate and "Read" Data From Objects	66
Object Data "Reading" Procedures	66
Examine Specific Objects to Find Data	66
Additional Observations of Objects	67
Test Events as They Are Documented	67
Identify Interviewees	67
Develop Interview Plan	67
Conduct Interviews	67
Interview Programmers	68
Prepare Report	69
Appendix A Investigator's Fire Process Model	71
Appendix B Criminal Investigation Decision Model	73
Appendix C Energy Sources	75
Appendix D Investigation Data Organization	79
Appendix E Photography Support For Fire Investigations	81
Appendix F Time/Loss Analysis For Investigations	83
Appendix G Recommendation Development Process	87
Appendix H Glossary of Investigation Terms For Fire Investigations	91
Fire Investigation References	93
